Size : 20/40, 40/60, 100/300  
Packing : As Per Buyer's Requirement

## PUD SHRIMPS SEA CAUGHT

Size : 20/40, To Broken  
Packing : As Per Buyer's Requirement

## SQUID RING

Size : 20/40, 40/60 Broken  
Packing : As Per Buyer's Requirement

# J.M. SEA FOODS

EIC Approval No.1243

## PRODUCT LITERATURE

The J.M.Sea Foods established in 2003 Fish meal & fish oil is a commercial product made from fish and the bones and offal from processed fish. It is a brown powder or cake obtained by drying the fish or fish trimmings, often after cooking, and then grinding it.

Fishmeal can be made from almost any type of, but is generally manufactured from wild-caught, small marine fish that contain a high percentage of bones and oil, and are usually deemed not suitable for direct human consumption. Other sources of fishmeal are from bycatch of other fisheries and byproducts of trimmings made during processing (fish waste or offal) of various seafood products destined for direct human consumption. Virtually any fish or shellfish in the sea can be used to make fishmeal.

### PARAMETERS

Protein	60% above min
Sand / Silica	2% max
